The 2014 Winter Meeting in Baton Rouge was a success! The freezing temperatures and icy road conditions outside didn’t keep things from heating up inside. Sessions included Companion Animal, Practice Management, Large Animal and Veterinary Technician, and all covered a broad range of topics from “Exploratory Laparatomy” to “Business Valuation” to “Integrative Medicine.”

The exhibit hall featured 52 booths and provided entertainment and networking for attendees during breaks. Among the exhibitors were our meeting sponsors. Thanks to all of those that helped to make this year’s meeting a success. Sponsors included: MedVet Medical and Cancer Center for Pets, IDEXX Laboratories, South Paws Veterinary Surgical Specialists, Merial, 3 Sided Media, Postlethwaite & Netterville, Baton Rouge Veterinary Specialists, Southern Veterinary Eye Care, DVM Consultants, Longo Architecture Studio, Novartis Animal Health, (ETC)

During the Business Meeting and Veterinarian Luncheon new officers were installed and the 2013 LVMA awards were presented. Dr. Sue Olivier assumed the role of President, replacing Dr. Dale Peyroux. The newly elected LVMA Board of Directors is as follows: Dr. Sue Olivier, President; Dr. Kirk Ryan, President-Elect; Dr. Trisha Marullo, Vice President; Dr. Dale Peyroux, Immediate Past President; Dr. Amy Grayson, Treasurer; Dr. James Rundell, District 2; Dr. David McGraw, District 3; Dr. Matt Traylor, District 4; Dr. Carl Helouin, District 6; Dr. Edwin Davis, Member-at-Large; Dr. Marion Sewell, Member-at-Large. Also elected was a new Board of Trustees for the Dr. Walter J. Ernst, Jr. Veterinary Memorial Foundation. Inducted were: Dr. Carl Helouin, President; Dr. Gordon Pirie, Treasurer; Dr. Richard Lefebvre, Trustee; Dr. Jacqueline Simon, Trustee; and Dr. Ann Guidry, Trustee.

The 2013 LVMA Awards were also presented during the meeting. The recipients of those awards were: Dr. David Hesse, Everett D. Besch Distinguished Service Award; Dean Peter Haynes, Veterinarian of the Year; Jodi Bryant, Support Person of the Year; “Raj” owned by Anita Hartzell, Pet of the Year; and Jimmy Rumore, Jr., Salesperson of the Year.

Thanks to everyone that participated in the 2014 Winter Meeting. It would not have been as successful without all of your commitment to veterinary medicine.

Please turn to page 9 for more pictures from the Winter Meeting.
So here we are having already zipped past January. I'm wishing prosperity and good health for all of us in the new year. Wishing good health to people is a sign of old age, isn't it? So is forgetting, so I'm hoping I don't forget I did that and wish it for you again in the next newsletter. Oh my, where ARE my keys?

Moving right along...it seems the LVMA will be busy again this year. There is much legislation and many rulings that may affect our profession. The good news for us as an association is that we have avoided the Prescription Drug Monitoring fiasco, have partially succeeded with the Veterinary Mobility Act and, so far, don't have to do rock, paper, scissors to see who gets the few, scant available RVTs. Our lobbyists, legislative committee and Commissioner of Agriculture seem to keep coming through when we need them.

I would like to thank Dr. Dale Peyroux for his leadership last year as well as (and I'm assuming here) his guidance in the coming year. I am looking forward to a productive year again in 2014.

Congratulations to Dr. Peter Haynes for receiving the Veterinarian of the Year Award and to Dr. David Hesse, the recipient of the Everett Besch Distinguished Service Award. The awards were presented at the annual LVMA winter meeting held this January in Baton Rouge, or was it Siberia? I can't be sure.

As your new president let me say, "I have a pen, and I have a phone." So do you. Don't hesitate to use them to contact me with any concerns, innovative ideas or questions. My mission is to get new people with amazing vision involved in leadership. Is it you?

Sincerely,

President’s Report
Sue Olivier, DVM

ICY ROADS, “RED HOT” PROGRAMS AT THE WINTER MEETING.....

The unusual weather did not chill the enthusiasm of attendees for the great programs presented at the 2014 LVMA Winter Meeting. Both the companion animal program committee (Drs. John Mauterer, Dale Peyroux and Sue Olivier) and large animal program committee (Drs. Jacques Fuselier, Darren Schilling, and Shannon Gonsoulin with assistance from Dr. Kirk Ryan) did great work! Attendance was definitely affected, as many registrants had difficulty travelling and our on-site registration numbers were down. However, in spite of the challenges, over 350 veterinarians attended and total attendance for the meeting was just over 550, making the Meeting a great success! Please put the 2015 Winter Meeting at the Lafayette Hilton, January 22-25, 2015, on your calendars today!

I would like to thank Dr. Dale Peyroux for his visionary leadership over the past year as president, for the years prior to his presidency, and for his anticipated service to the LVMA in the future. Congratulations to 2015 President Dr. Sue Olivier, President-elect Dr. Kirk Ryan, and Vice-President Dr. Trisha Marullo, as well as new Board member Dr. Marion Sewell, on their elections! Also, welcome back to the Board Past President Dr. David McGraw! Dr. Shannon Gonsoulin completed nine years of very distinguished service to the LVMA as a board member-at-large.....thanks Dr. Gonsoulin for that service and we look forward to more in the future! I feel very fortunate to serve a leadership group with such talent, intelligence and dedication.

The legislative season is heating up and Legislative Chair Dr. Patrick Thistlethwaite and LVMA advocates Bud Courson and Jim Nickel have been preparing for a very active one. Commissioner Mike Strain, DVM, continues to watch over legislative matters affecting veterinary medicine and is a huge factor in protecting the integrity of the profession.

Thanks to all of our volunteer leaders, past, present and future for your service! If you are not yet among that number, please do not hesitate to contact me or one of the LVMA Board members to express interest.

Stay well and stay connected!
The 2014 AVMA House of Delegates (HOD) Regular Winter Session was held January 10-11, during the Veterinary Leadership Conference in Chicago. Below is a brief summary. Contact Dr Roberson (Delegate) or Dr. Gross (Alternate Delegate) for additional information or to provide feedback. We welcome the opportunity to connect with you!

Informational Meeting

- Treasurer’s Report from Dr. Barb Schmidt
  - Since 2008, the AVMA has grown its Fund Balances by nearly $12 million (a 45% increase)
  - Total Funds under investment management with Bernstein Global as of 12/31.13 was approximately $45 million, including working capital

- Candidates for AVMA President-elect: Dr. Larry Dee from Florida and Dr. Joe Kinnarney from North Carolina; this is a one year term that progresses to President and Past-President, elected in July by the HOD

- Candidates for AVMA Vice President: Dr. Mark Russak from Connecticut and Dr. Rebecca Stinson-Dixon from North Carolina; primary duties of the Vice President are student relations, this is a two year term, elected in July by the HOD

- Group Health and Life Insurance Trust (GHLIT) Report from Ms. Libby Wallace
  - Started 2013 with 17,500 health policies and ended 2013 with over 13,000 policies
    - Open enrollment through the AVMA sponsored exchange continues through March 31, 2014 to get coverage this year; search by zip code to see what is available; visit http://www.avmaghlit.org/content/members.aspx
  - All the other Premier products are still available through the GHLIT: Disability income, Life insurance, Hospital indemnity (income when outpatient surgery or hospitalization prohibits them from working), Ancillary products (dental, vision, etc.) for staff members too
  - Financial stability - $30 million in reserves by end of 2014
    - New York Life Insurance is the underwriter and #1 in the industry

- American Veterinary Medical Foundation (AVMF) Report from Dr. Richard Streett
  - 4-star charity; only national charity under the guidance of veterinarians
  - Total income $8 million in 2013 with 85% programmatic distribution in 2012
    - $2 million awarded in veterinary student scholarships

- AVMA Veterinary Economics Division Report from Dr. Mike Dicks
  - U.S. economic downturn resulted in less disposable income available for veterinary services (loss in demand for services); combine this with the fact that the demand for veterinary services has been saturated at the current prices
  - How to address it? Fix the demand for services, which will be ascertained through a 12 metropolitan service consumer survey (need the data)
  - Please participate in surveys when you get them so AVMA can get accurate data

The Plenary Session was devoted to a facilitated discussion on the proposed AVMA governance structure, and included participation from representatives of all attendee categories (HOD, Emerging Leaders, state and allied organizations). The HOD provided input provided on a variety of topics including how HOD members would be selected/elected within their states, term limits, and their authority/responsibilities. Other topics included election/selection of the president-elect and treasurer. The Governance Engagement Team (GET) will review the comments received and provide a report with suggestions to the Executive Board by their next meeting. After this meeting, it was evident that change will be slow to allow voices to be heard. There is a plan for more discussion in July at the next HOD session.

Bylaws and Resolutions Considered by the HOD

- Proposed Bylaws Amendment 1-2014, which would remove some requirements from the member application process in effort to eliminate barriers for veterinarians who want to belong to the AVMA, was adopted with a 93.3% vote in favor.

- Proposed Bylaws Amendment 2-2014, which would focus the AVMA’s Mission and Objective statements on the membership, was referred to the Executive Board for clarification of language with instruction to return with a recommendation to the HOD at the 2014 Regular Annual Session in July. Concerns were heard about the omission of the term “agriculture” from the purpose and it was included in the suggested amendments.

- Resolution 1-2014, which would have recommended that the Executive Board initiate steps to cease the accreditation of foreign veterinary schools (those outside the US and Canada) by the AVMA Council on Education, garnered a healthy discussion in the HOD. Several delegates spoke against the resolution, including the

(Continued on page 4)
SAVMA president and a delegate who is a foreign graduate. A number of delegates expressed their appreciation for the opportunity to discuss this issue in the HOD. The resolution was not adopted, with 79.9% voting against it. The process of accreditation can be confusing for members and additional information is available and would be helpful for concerned members to familiarize themselves with the steps and standards. Executive Board Response and FAQs

- **Resolution 2-2014**, which was submitted by member petition, requested the AVMA to adopt a policy statement discouraging the feeding of jerky pet food products commonly known as “jerky treats.” The resolution was referred back to the AVMA Executive Board with the following recommendation: “rather than developing a policy, the AVMA encourage its members to provide input to the Food and Drug Administration (FDA) on incidents and conditions, which could be associated with pet food and treats; and continue to work with FDA to enhance efforts in safeguarding a healthy pet population through quality control of pet food and treats.”

- **Resolution 3-2013**, which had been carried over from 2013, called for an AVMA policy stating that “homeopathy has been identified as an ineffective practice and its use is discouraged.” The topic generated a significant amount of discussion at the 2013 Regular Winter Session, as well as public debate about the proposed resolution. This resolution was not adopted, with 90.1% voting against it.

- **Resolution 4-2013**, which would have granted admission of the American Academy of Veterinary Acupuncture (AAVC) into the AVMA House of Delegates as a constituent allied veterinary organization, had also been deferred from a previous 2013 meeting in order to gather more information. Based on the information received, the HOD voted 96.6% in favor of admitting the AAVC into the HOD. They can now send a Delegate and an Alternate Delegate to the HOD sessions.

Respectfully submitted,

C. Wayne Roberson, DVM  Bobby Gross, DVM
Cwr1288@yahoo.com  rgdvm@aol.com

Dr. Olivier Attends LSU SVM Coating Ceremony

On February 7, the LSU SVM held its annual White Coat Ceremony, and 84 third-year veterinary students received their white coats, signifying the beginning of Phase II of their veterinary medical education. Phase I begins with Year I and consists of lectures and labs; Phase II begins with the second semester of Year III and consists of hospital rotations.

Dr. Sue Olivier attended the ceremony to represent the LVMA.

“It was fun to see the students so excited about getting to start the real meat of their education, getting to wear that white coat,” say Dr. Olivier.

Veterinary students have two phases to their curriculum: Phase I with labs and lectures and Phase II with hospital rotations. Students must declare a concentration in phase 2: small animal practice (working with pets), equine practice (working with... (Continued on page 9)

Signalment and History: “Lucky,” a 4 month old male Labrador retriever puppy presented for evaluation of fever, lethargy and failure to thrive. Out of six puppies in the litter, only three survived. One puppy was growing normally, but a female littermate (“Miracle”) was similarly affected (Figure 1). Three littermates died in the first few weeks of life. The litter occurred from an accidental mating of brother and sister (Figure 2). The two affected puppies experienced delayed development (eyes opened later than other puppies, and both puppies had apparent impaired learning ability).

Physical examination: Lucky was quiet and depressed but alert. Body weight at presentation was 5.6 kg (12.3 pounds). Examination revealed recently erupted deciduous teeth and a prominent protruding tongue. Joints, particularly the hocks and carpi, were lax and painful. A broad head and short limbs characteristic of disproportionate dwarfism were noted (Figures 3, 4).

Clinical Evaluation: Laboratory evaluation detected anemia (PCV 21%) and mild hypercholesterolemia (265 mg/dl). Serum bile acids were normal. Radiographs (figure 5) revealed multiple open growth plates, shortened and square shaped vertebral bodies, and a variable degree of mineralization, consistent with the skeletal maturity of a puppy 1-2 months of age.

Disproportionate dwarfism is rare in dogs. Possible causes include congenital endocrinopathy, inherited skeletal disorders (chondrodystrophy), and certain metabolic disorders (lysosomal storage diseases). Considering these possibilities, a thyroid panel was performed. In both puppies, the Free T4 and Total T4 were both undetectably low with a normal TSH, leading to a diagnosis of congenital hypothyroidism.

Outcome: Hormone supplementation with levothyroxine resulted in significant clinical improvement in both dogs during the past three months. However, the puppies still lag behind their normal littermate in both learning ability and physical stature.

Review: Congenital hypothyroidism is a rare condition, accounting for approximately 3.6% of hypothyroidism in dogs. This statistic is most likely underestimated, as many affected puppies die early in life before a diagnosis can be made. Clinical signs, including dermatological and neurological signs, are similar to acquired hypothyroidism in adults. In puppies, however, disproportionate dwarfism and delayed dentition and epiphyseal ossification are usually also present. The prognosis is guarded. Although mental dullness, growth deficits and other clinical signs will improve with treatment, affected dogs usually suffer from degenerative joint disease later in life and have a shorter life expectancy.

A special thank you to Lucky and Miracle’s family, and to Dr. David Batt and Acadia Animal Medical Center for this referral and their support of our hospital.
5 Reasons You Should Attend ENGAGE2014

- Best Veterinary Conference in the Southwest
- Offering over 400 hours of Lectures & Labs with more than 50 Continuing Education credit hours
- Over 225 exhibitors presenting leading edge products and services
- Budget friendly conference that’s easy to navigate
- Social networking events like SWVS Stride 5K Fun Run and Golf Tournament

Visit www.SWVS.org for registration details.
At Southern Veterinary Eye Care we are committed to providing the highest quality veterinary ophthalmic care to our patients in a compassionate environment, while keeping our clients and referring veterinarians well informed during the treatment process.

We believe that as a referring veterinarian you deserve to be able to refer a case without it slowing down your day. That is why we offer same day appointments and around the clock ocular emergency availability.

Now seeing cases in the Greater New Orleans Area. Please call for details!

SOUTHERN VETERINARY EYE CARE OFFERS A WIDE RANGE OF MEDICAL AND SURGICAL THERAPIES TO HELP IMPROVE VISION AND COMFORT:

- Micro-incision cataract surgery with artificial lens implantation
- Corneal repair and reconstruction
- Eyelid and nasolacrimal repair and reconstruction (Entropion, Ectropion, Medial Canthal Closure)
- Lid mass removal
- Glaucoma surgical and medical management
- Dry eye surgical (Parotid Duct Transposition) and medical management
- Prolapsed gland of the third eyelid repair (Cherry Eye)
- Intra-ocular prosthesis surgery
- Enucleation (eye removal) with intra-orbital implant
- Medical therapy for inflammatory and infectious eye diseases
- Emergency eye care 24 hours a day and 7 days a week
- Breed eye certifications
- Full Ophthalmic Examinations (Slit Lamp Bio-Microscopy, Retinal Exam) with diagnostic testing (Intraocular Pressure Measurement, Tear Testing, Fluorescein Staining)
- Gonioscopy (Diagnosing the Potential for Glaucoma Susceptibility)
- Retinal testing (Electroretinography)
- Ocular ultrasound
Don't forget to renew your membership for 2014!

You don’t want to miss out on all of the benefits LVMA has to offer.

There’s still time to renew.
If you have not received a membership renewal form in the mail, please contact the office at (225) 928-5862 or office@lvma.org.
